CV ARTHA DWIPUTRA GLOBAL

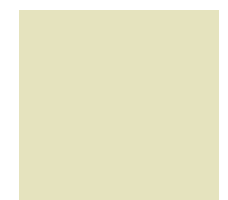

From the
paradise land
of Indonesia

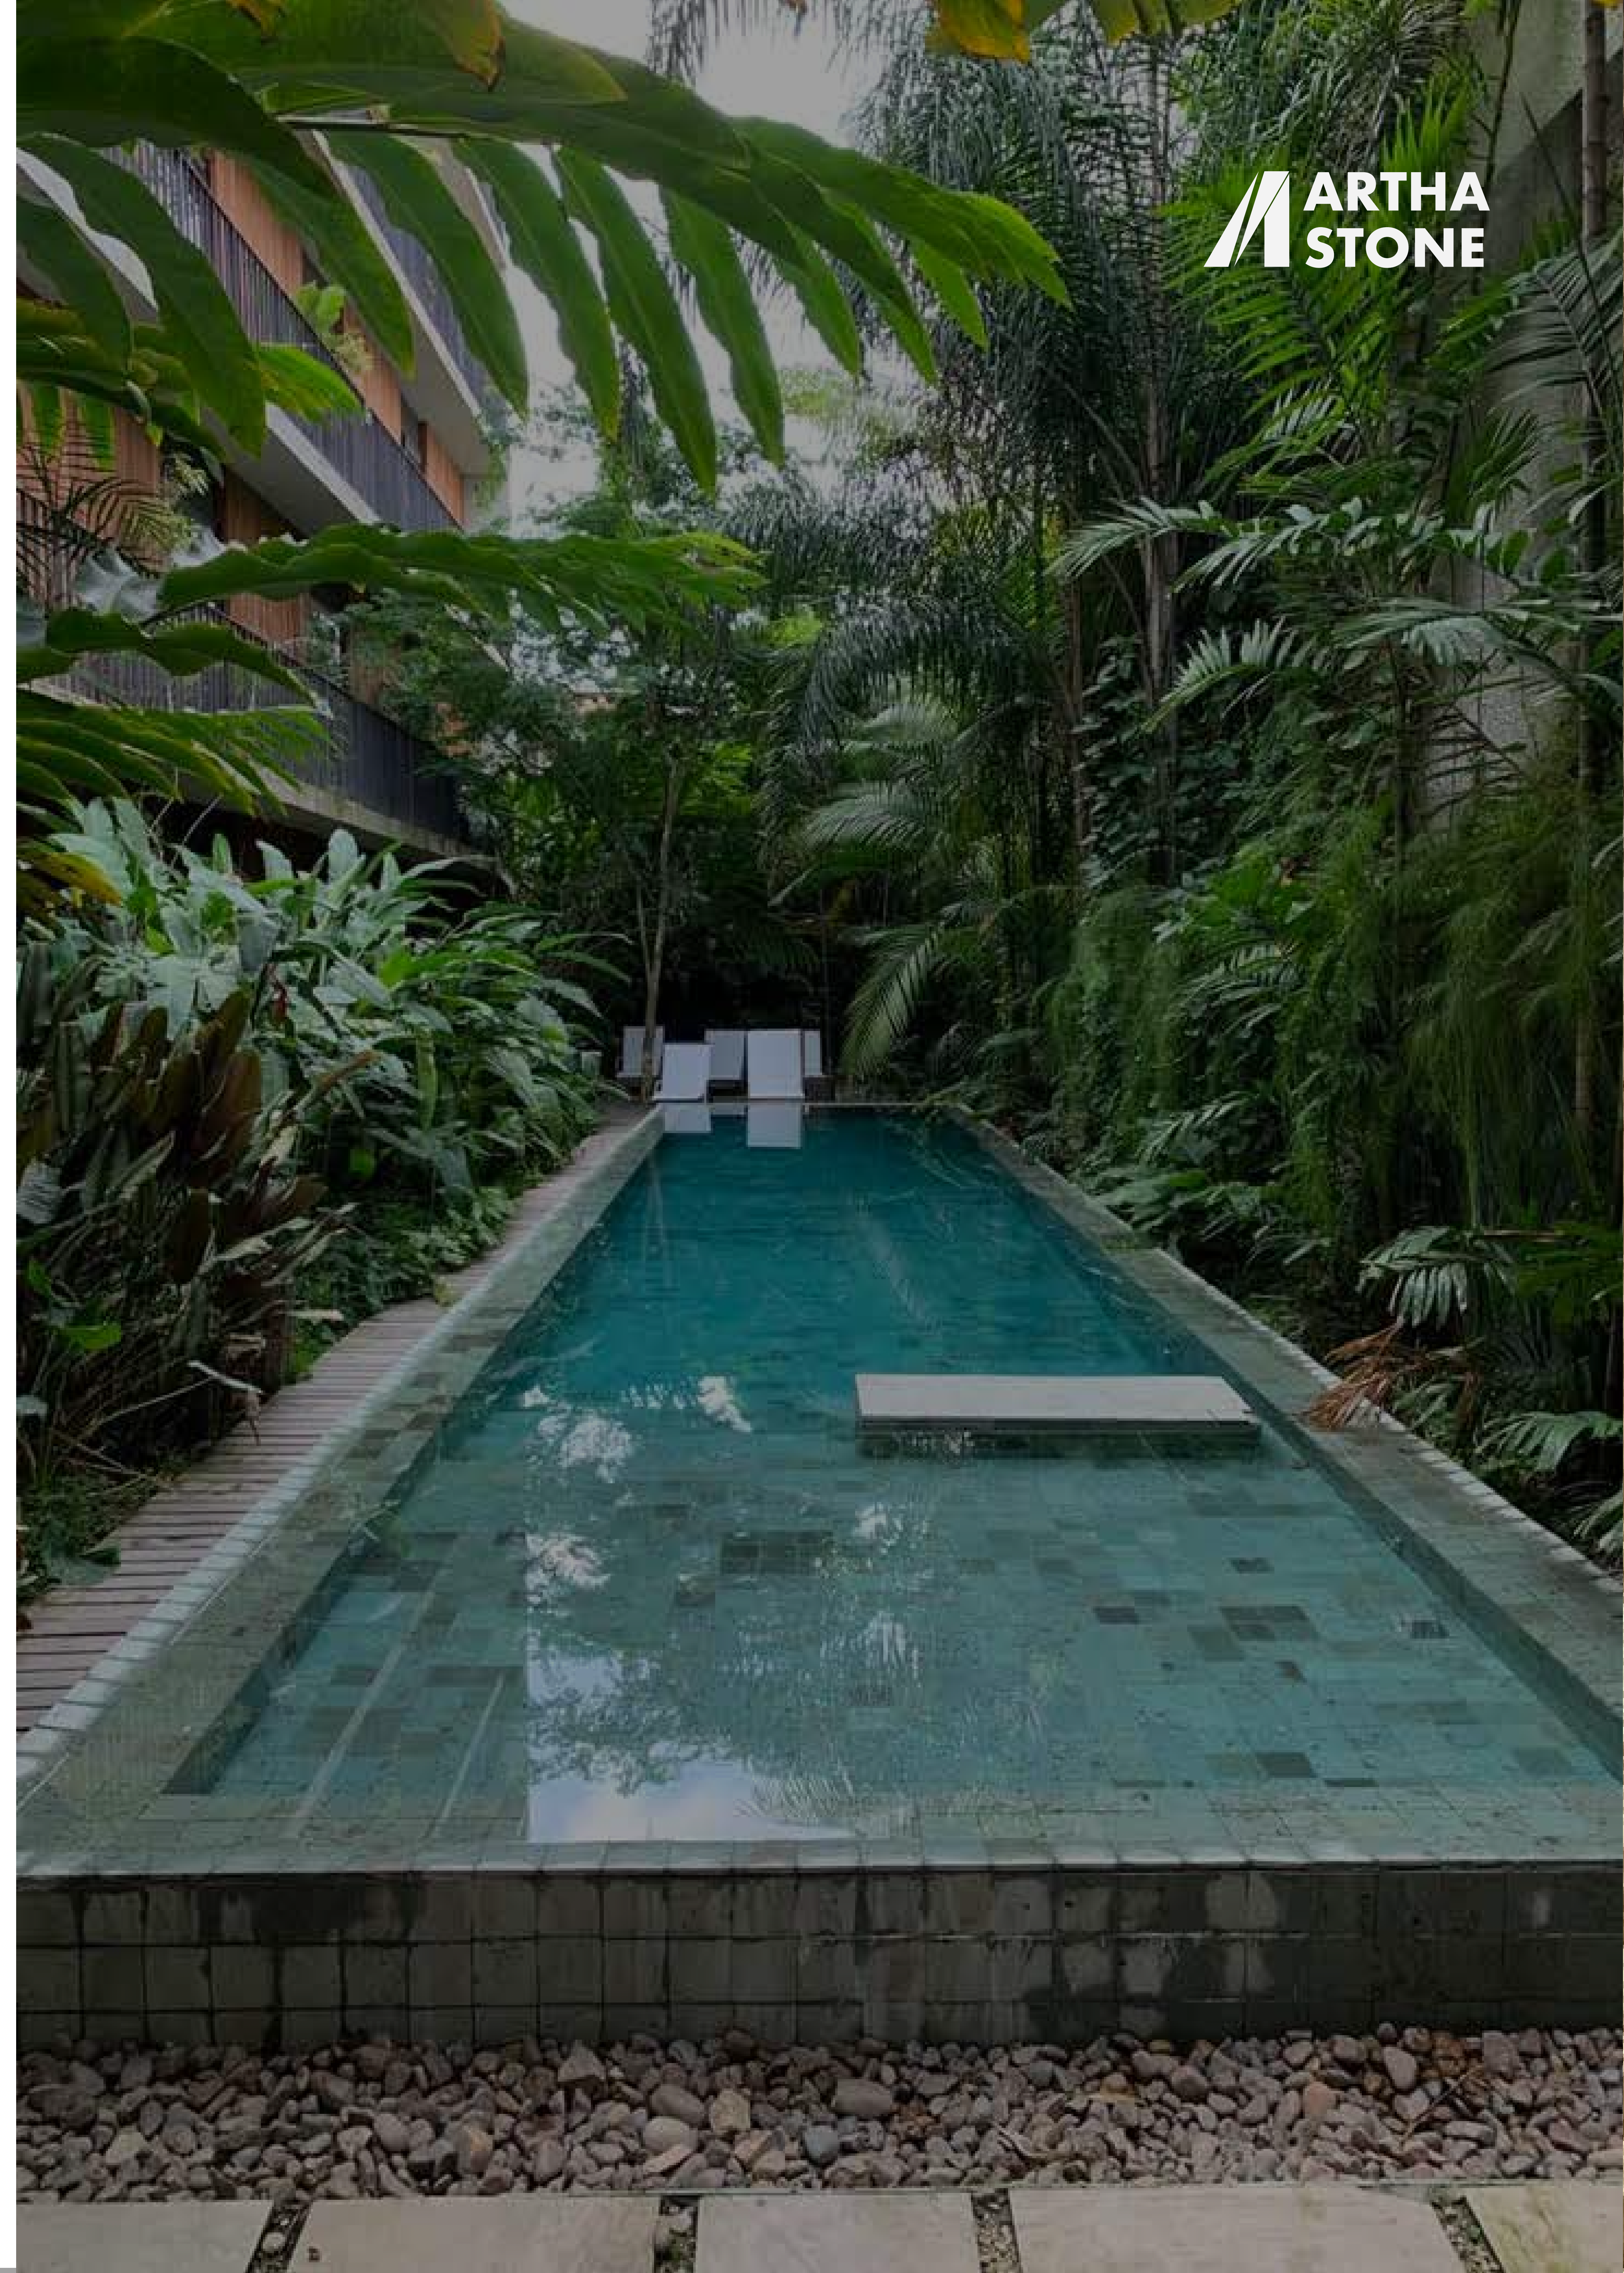

Artha Stone was established as a part of visionary expansion from CV Artha Dwiputra Global, aiming to be a world-class natural stone supplier with expertise in manufacturing, exporting, and custom stone solutions.

Initially, we focused on domestic projects in Indonesia. However, as demand for high-quality natural stone grew, we expanded our reach to the global market. Today, Artha Stone proudly supplies premium natural stone to clients worldwide, delivering exceptional craftsmanship and sustainable materials. Through our commitment and expertise, we have successfully exported to various countries, supporting architectural, construction, and landscaping projects with top-tier stone products.

Green Sukabumi Stone Bali

Bali Green Stone is a type of quartzite that is specifically designed for swimming pool applications, making it an excellent choice for luxury pool tiles. Many high-end resorts and villas worldwide incorporate this exquisite stone into their pools, including Bulgari Resort Dubai, Sofitel Nusa Dua Bali, as well as prestigious locations in Hawaii, Phuket, Sanya, Haikou, the Maldives, Rio de Janeiro, and various other upscale projects.

In addition to pool tiling, Bali Sukabumi Stone (also known as Pedra Hijau Lisa) is highly versatile and can be used as a decorative element beyond the pool area. It is often applied for wall cladding, and its split-face variation can enhance smaller pools when seamlessly integrated with a main pool, creating a sophisticated and natural aesthetic.

ARTHA STONE CATALOG

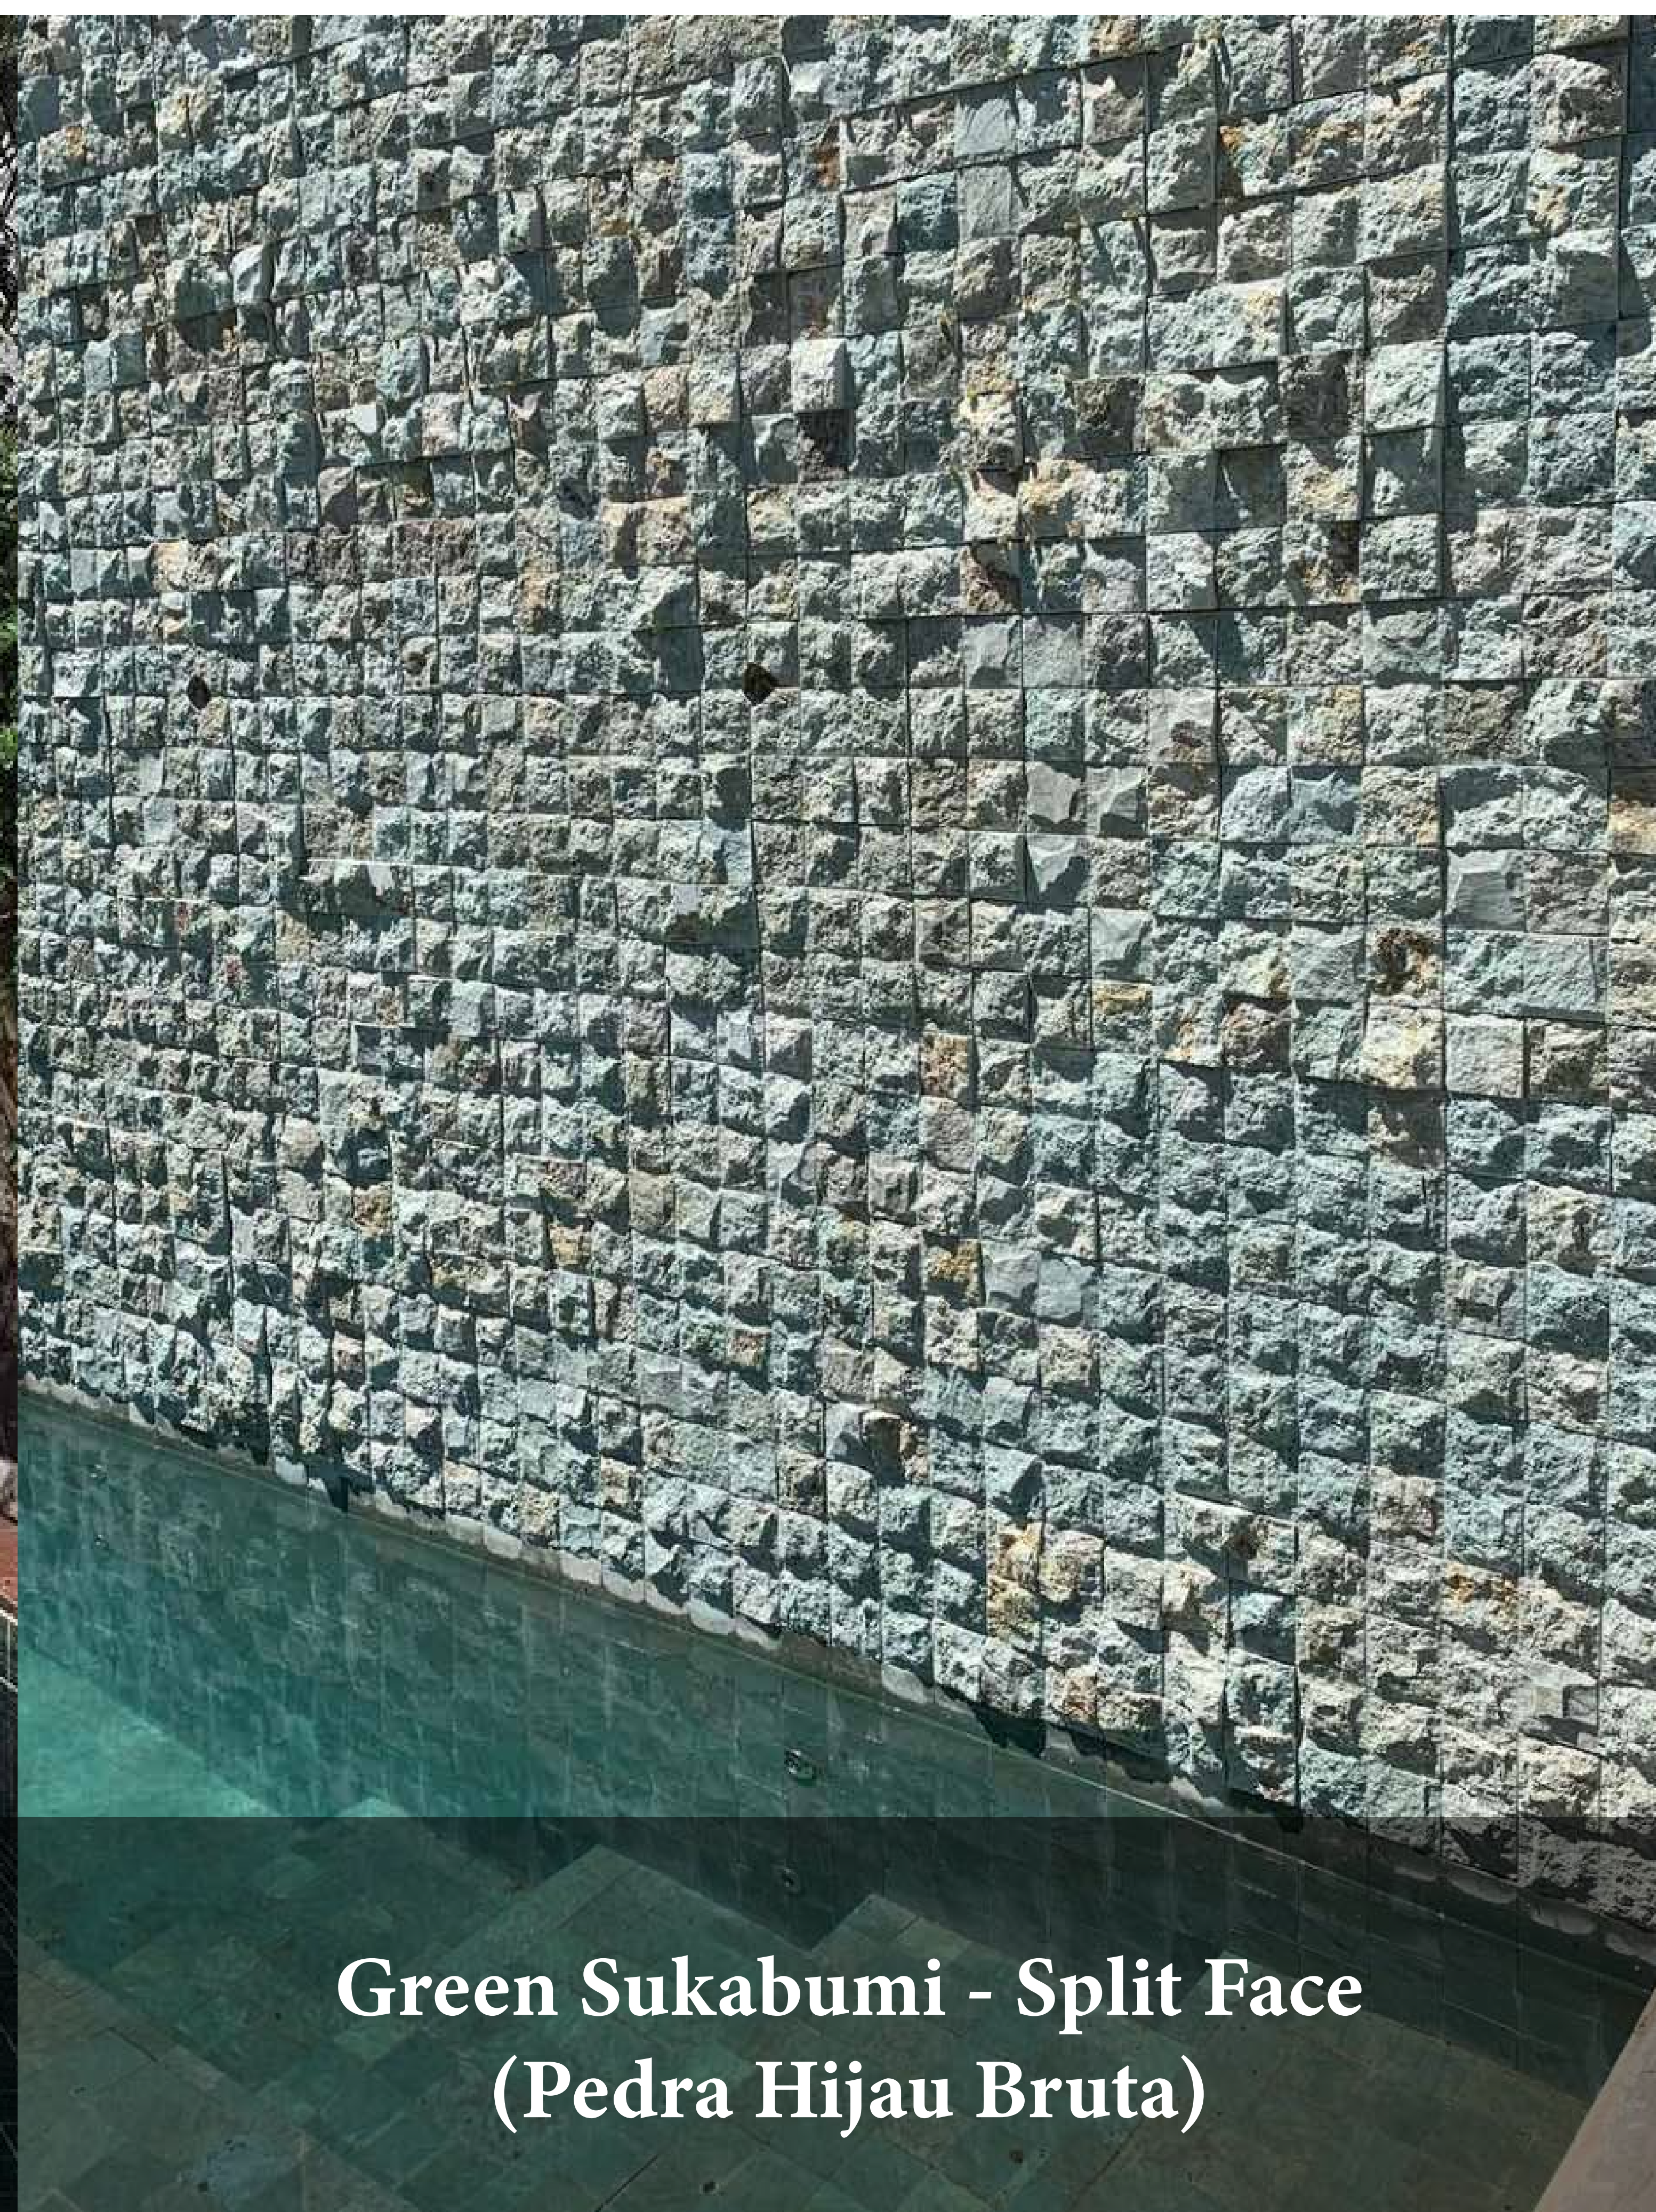

Green Sukabumi - Sawn Cut/Honed
(Pedra Hijau Lisa)

Product Description :

Size available: 10x10 cm, 10x20 cm,
15x15 cm, 20x20 cm, 20x40 cm,
30x30 cm

Thickness available: 1 ~ 3 cm

Material Type: Quartzite

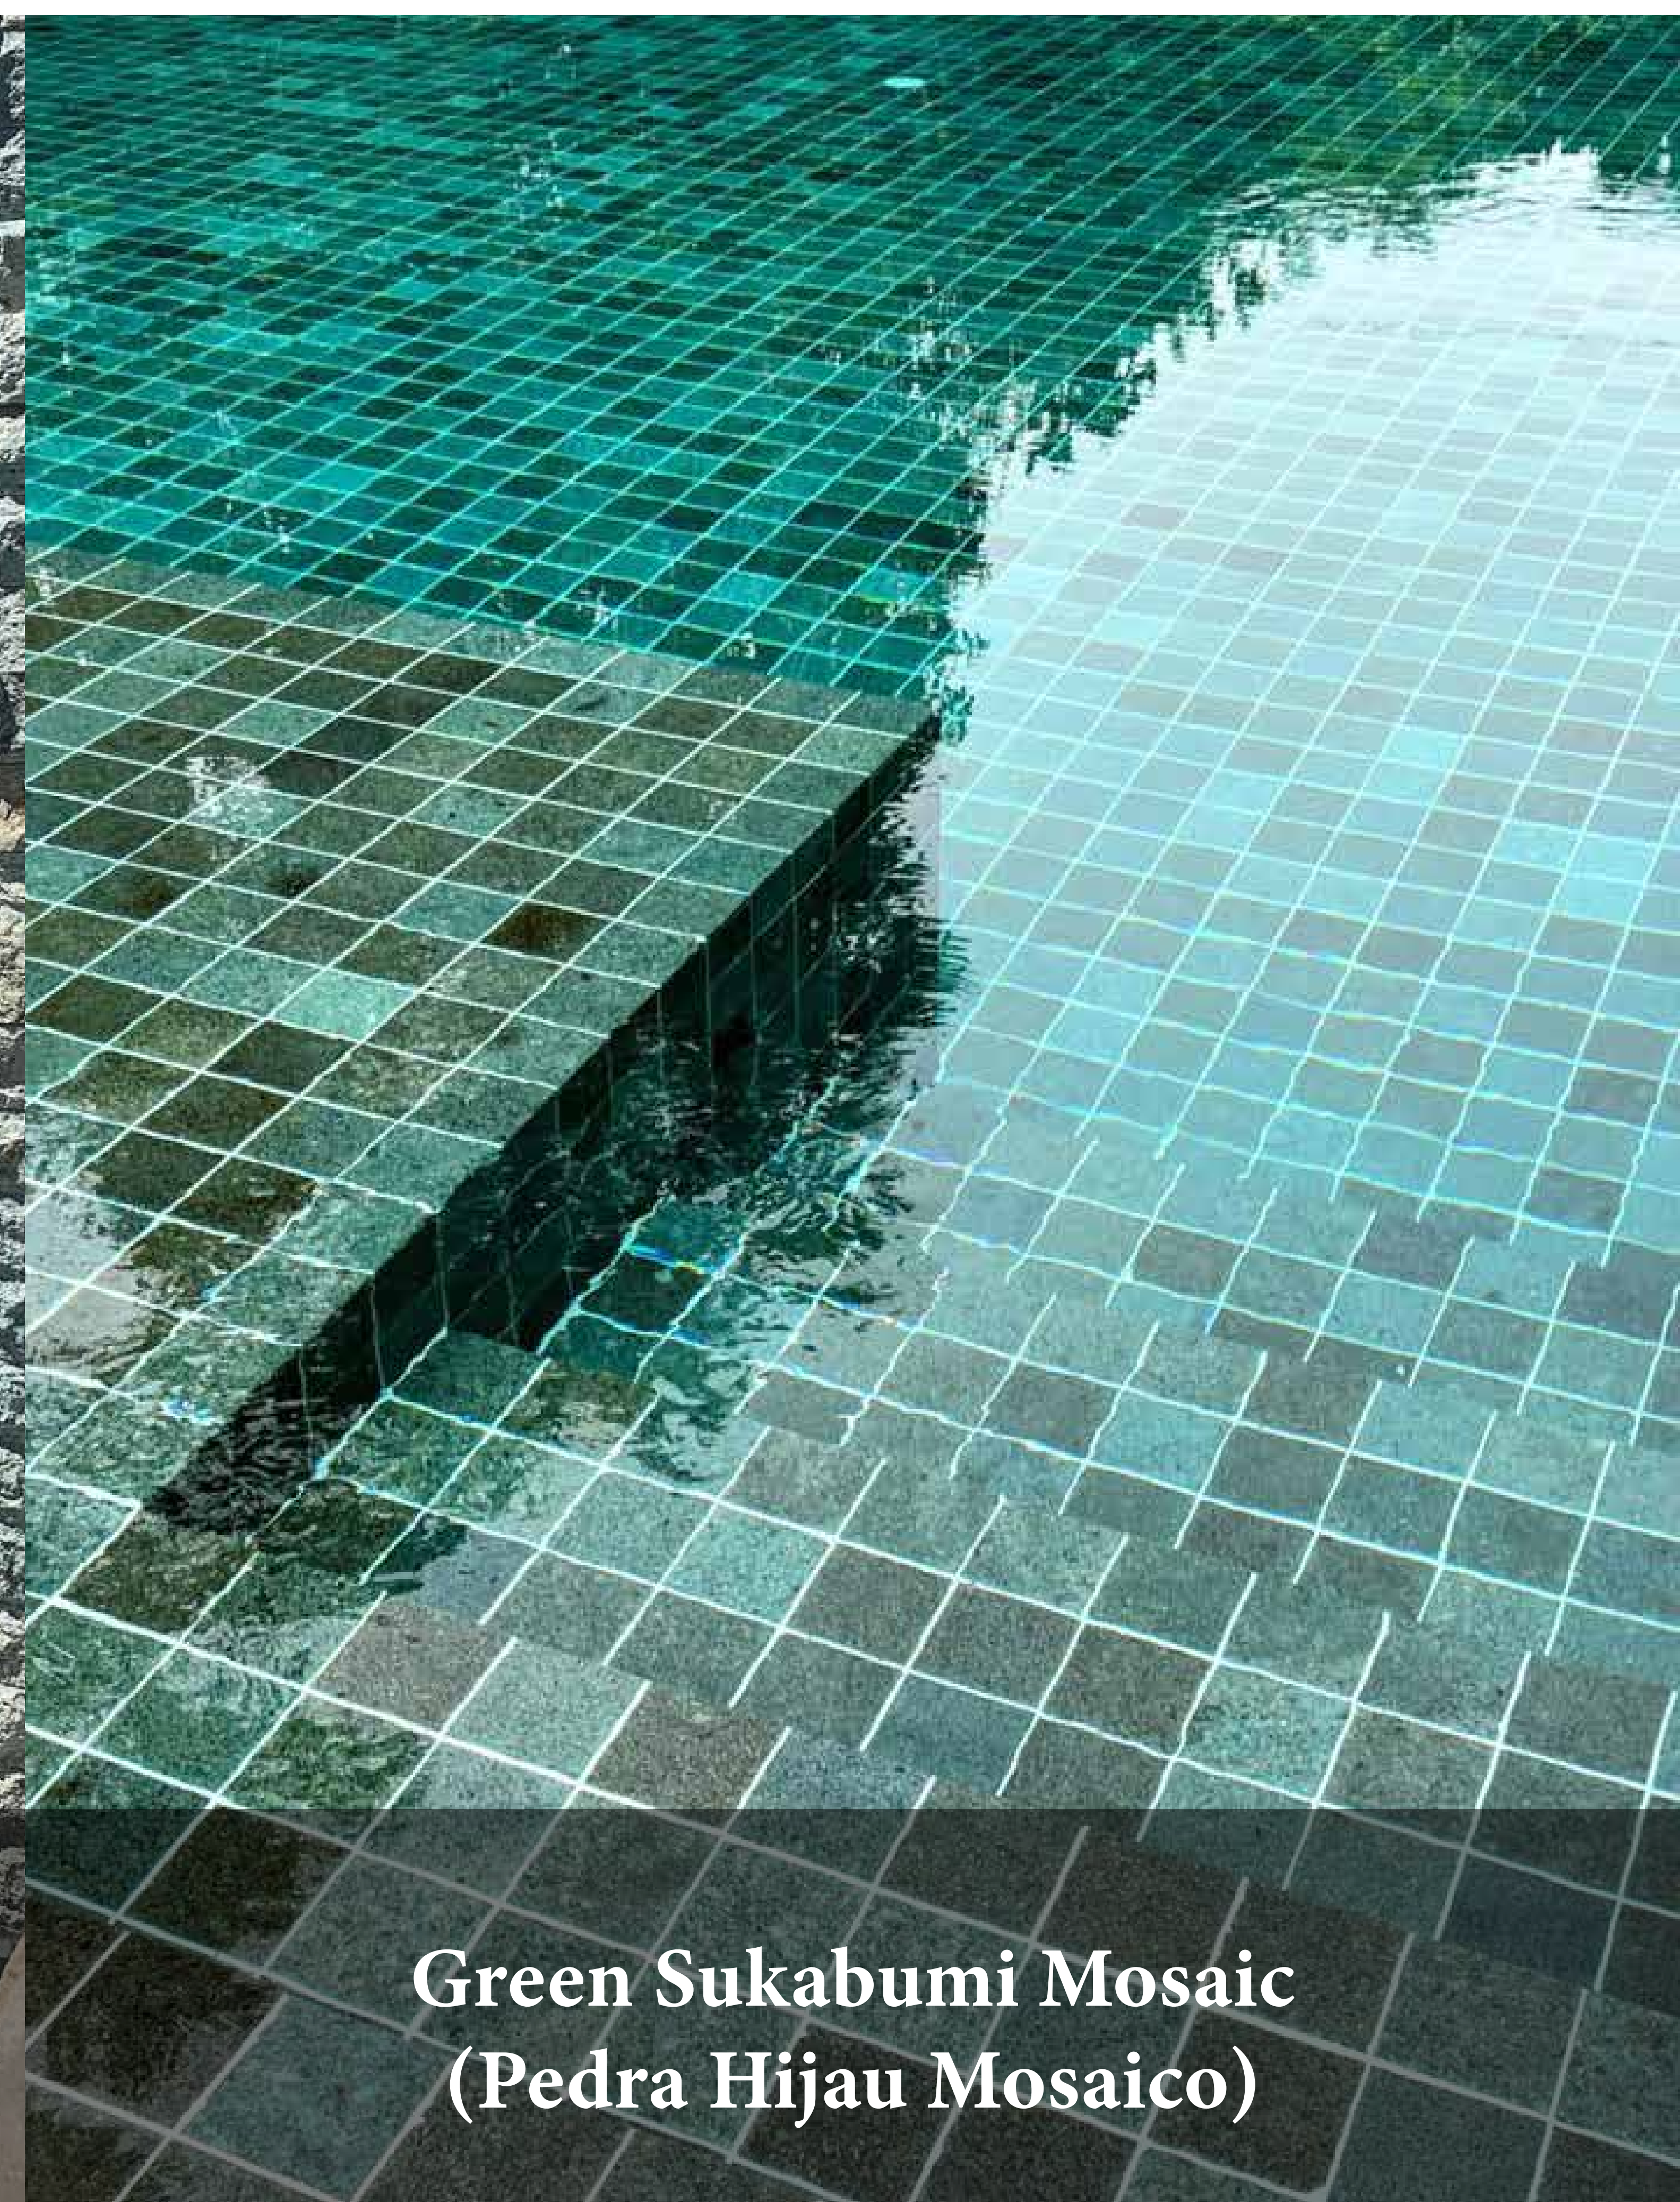

Green Sukabumi - Split Face
(Pedra Hijau Bruta)

Product Description :

Size available: 10x10 cm, 10x20 cm,

30x30 cm

Thickness available: 2 ~ 3 cm

Material Type: Quartzite

Green Sukabumi Mosaic
(Pedra Hijau Mosaico)

Product Description :

Size available (in mesh) : 300x300 mm
Size available (chips): 25x25 mm, 50x50
mm, 100x100 mm

Thickness available: 1 cm

Material Type: Quartzite

Black LavaStone

The exceptional durability, versatility, and natural beauty of Bali Lavastone Cladding make it an ideal choice for enhancing interior and exterior spaces. Originating from the volcanic landscapes of Java, Indonesia, these deep black stones have captivated people worldwide with their timeless elegance and strength.

Also known as Pedra Black Lava, this stone is renowned for its remarkable resilience, as demonstrated by its use in the construction of Borobudur, the world's largest Buddhist temple. Standing for centuries without significant damage, it showcases the enduring quality that makes it a preferred material for architectural and decorative applications today.

Size available (chips): 25x25 mm, 50x50
mm, 100x100 mm

Thickness available: 1 cm

Material Type: Volcanic Stone

Bali LimeStone

Limestone is a sedimentary rock formed from the accumulation of marine organisms such as shells, mollusks, and corals, undergoing natural precipitation beneath the sea. This process gives limestone its distinctive surface textures and patterns.

Bali Limestone, also known as Pedra Limestone, stands out due to its high mineral content, including gypsum, calcite, and halite, making it unique compared to other types of limestone. Unlike conventional limestone, Bali Limestone is free from fragmented materials such as pebbles, rubble, or fossils, resulting in exceptional strength and durability. This natural resilience allows it to withstand harsh weather conditions, making it an excellent choice for exterior wall panels and architectural applications.

ARTHA STONE CATALOG

White Limestone Random Pattern
(Pedra Limestone)

Product Description :

Size available: RDM x RDM
Thickness available: 2 ~ 3 cm
Material Type: Limestone

White Limestone Tiles
(Pedra Limestone)

Product Description :

The background image shows a modern, two-story house with a grey facade and a dark roof. In the foreground, there is a low wall made of Bali Sandstone blocks. To the left, there are trees with green and yellow leaves. The sky is blue with some white clouds.

Bali Sandstone

Bali Sandstone has been a preferred choice in architecture for centuries, captivating designers and builders worldwide. This sedimentary stone is highly valued for its timeless aesthetic and versatility, making it a top selection for stone wall cladding in both traditional and contemporary projects.

Also known as Pedra Ocean, Bali Sandstone is a dense and durable natural material, renowned for its exceptional strength and longevity. Its resilience is evident in its use in ancient structures that have stood the test of time. Additionally, modern architects appreciate its fire-resistant properties, providing an extra layer of protection to buildings while enhancing their visual appeal.

Material Type: Sandstone

Finishing: Sawn Cut, Honed, Split Face

Andesite Stone

Andesite Stone: Strength and Elegance in Every Detail Known for its exceptional durability and timeless beauty, Andesite Stone has long been a preferred material for architectural and landscaping projects. This volcanic rock is formed through natural cooling processes, giving it a dense structure, high strength, and excellent weather resistance.

With its non-slip surface and low water absorption, andesite is an ideal choice for paving, wall cladding, and outdoor applications, ensuring both safety and longevity. Its elegant natural shades, ranging from deep charcoal to subtle gray, offer a modern yet organic aesthetic, making it a favorite among designers and builders worldwide.

Used in both historical structures and contemporary architecture, andesite remains a reliable and sophisticated solution for those seeking a premium natural stone with unmatched resilience. Its minimal maintenance and resistance to extreme conditions further solidify its position as a top-tier choice in construction and design.
